ABOUT US

The Malaysian Technical Cooperation Programme (MTCP) was established in 1980 as Malaysia's commitment to South-South Cooperation through the sharing of Malaysia's development experiences and expertise with other developing countries.

MTCP is premised on the principle that the development of a country is dependent on the quality of its human capital and resources. MTCP emphasises on human resources development mainly through training and capacity-building courses including short-term courses at Malaysian public and private training institutions, and fully funded scholarship at Malaysian public universities.

Annually, Malaysia offered more than 65 technical training and capacity-building programmes under the MTCP, which have benefited more than 37,000 participants from 144 countries.
